**For Immediate Release**  
Date: October 3, 1994

**Subject: DEOILER™ OILY CONDENSATAE TREATMENT FILTER**

*WaterSmart Environmental, Inc.* announces the availability of the DeOiler™ oily condensatae treatment filter. Several modern methods of hydrocarbon and lubricant removal were employed which have resulted in the **longest lasting** condensate treatment product available in the marketplace. No other unit even comes close to treating the same number of gallons. This feature means fewer replacements by the user. Whether the compressor uses glycol, silicone, or petroleum based lubricants the level of treatment remains the same - - less than 2 ppm oil in effluent. Compliance with sewer discharge permits is guaranteed or the manufacturer pays the fine.

*WaterSmart Environmental, Inc.* is a provider of waste-to-energy, food independence, water independence, and energy independence technologies and a manufacturer of highly engineered water purification components and systems. The company designs and builds a wide variety of water treatment equipment including packaged water and wastewater treatment plants, UltraPac™ aerobic package plants, OAT™ Process anaerobic digesters with associated energy production, aerators, filters, PuriSep™ and SmartWater™ oil/water and solids/liquids separators, RainDrain™ perimeter trench sand filters for stormwater runoff, dissolved air flotation separators, air strippers, complete skid assembled aqueous waste treatment plants, FilterFresh™ skid mounted potable water production plants, skid mounted wastewater treatment systems for laundromats, commercial laundries, and car/truck wash facilities with water reclamation and reuse, softeners, demineralizers, activated carbon treatment equipment, and water purifiers for domestic and international markets.
