Subject: New Design Manual Offers Hard-To-Find Information

WaterSmart Environmental, Inc. (WSE) a manufacturer of water and wastewater treatment equipment, announces the availability of a comprehensive Design Manual and Tutorial on Particle/Liquid Separation. The comprehensive manual contains extensive information and example calculations on this somewhat new and sophisticated technology.

The updated manual, now expanded to 50 pages, addresses solids/liquid, liquid/liquid, and dissolved air flotation separation technologies. Liquid/liquid separators are also known as oil/water separators. Particle/liquid separation courses are rarely taught by American universities making this Design Manual a valuable resource for contractors and consulting engineers. Over 10,000 copies of a prior edition of the manual have been requested and distributed.

For more information or to request a complimentary copy of the Design Manual (WSE Publication No. 796) contact the company through its Website.

WaterSmart Environmental, Inc. is a manufacturer of highly engineered water purification components and systems. The company designs and builds a wide variety of water treatment equipment including packaged water and wastewater treatment plants, UltraPac™ aerobic package plants, OAT™ Process anaerobic digesters with associated energy production, aerators, filters, PuriSep™ oil/water and solids/liquid separators, RainDrain™ perimeter trench sand filters for stormwater runoff, dissolved air flotation separators, air strippers, complete skid assembled aqueous waste treatment plants, FilterFresh™ skid mounted potable water production plants, skid mounted wastewater treatment systems for laundromats, laundries, and car/truck wash facilities with water reclamation and reuse, softeners, demineralizers, activated carbon treatment equipment, and water purifiers for domestic and international markets.
