Subject: Packaged Wastewater Treatment Plants

WaterSmart Environmental, Inc. has introduced a product line of packaged wastewater treatment plants which provide ultra high levels of purification. Nitrification and sludge disposal are also achieved. Sized from 1,000 to 75,000 gallons per day, these factory built plants were designed for housing subdivisions, country service station/restaurants, highway rest stops, trailer & mobile home parks, and recreation/camp/construction sites. Called UltraPaq™, these plants use the rotating biological surface (RBS) aeration process. Operating horsepower is less than 1/3rd that of equivalent capacity extended air packaged treatment. Equipment size of the UltraPaq™ is less than 1/2 that of any other mechanical treatment plant. Pre-mounted spare parts assure maximum reliability. The UltraPaq™ Plants carry a standard 5 year warranty.

WaterSmart Environmental, Inc. is a manufacturer of highly engineered water purification components and systems. The company designs and builds a wide variety of water treatment equipment including packaged water and wastewater treatment plants, UltraPaq™ aerobic package plants, OAT™ Process anaerobic digesters with associated energy production, aerators, filters, PuriSep™ oil/water and solids/liquid separators, RainDrain™ perimeter trench sand filters for stormwater runoff, dissolved air flotation separators, air strippers, complete skid assembled aqueous waste treatment plants, FilterFresh™ skid mounted potable water production plants, skid mounted wastewater treatment systems for laundromats, laundries, and car/truck wash facilities with water reclamation and reuse, softeners, demineralizers, activated carbon treatment equipment, and water purifiers for domestic and international markets.
